| PROFILE

Manual Testing professional with 3 years of experience in testing mobile, web, and desktop applications, including CE-certified medical and compliance-critical systems. Skilled in test case creation, functional testing, regression testing, defect tracking, bug reporting, and Jira in Agile/Scrum environments. Good understanding of SDLC, STLC, and bug life cycle. Strong knowledge of software quality assurance processes with excellent analytical and problem-solving skills. Currently learning Playwright with an interest in expanding into Automation Testing.

| SKILLS

- Manual Testing (Functional, Regression, Smoke, Sanity) • Test Case Design & Execution
- Defect Reporting (Excel, Jira) • SDLC & STLC • Agile / Scrum • Flutter & Dart (Basic) • AWS (S3, Lambda, EC2) • Firebase (Auth, Storage) • GitHub • Linux • Shell • Xcode • C • java

| WORK EXPERIENCE

Borm Bruckmeier Verlag GmbH – Software Developer - (Aug 2022 – Present)

- Used AI-assisted tools for debugging, test scenario analysis, and improving testing efficiency during development and QA activities.
- Improved CI/CD workflows using GitHub Actions, shell scripts, and Python automation scripts to handle build generation and automated workflow processes.
- Performed manual testing for CE-certified medical applications across mobile, web,

and desktop platforms, including functional, smoke, sanity, and regression testing.

- Designed and executed test cases, reported and tracked defects using Excel and Jira, and collaborated with developers to verify bug fixes and ensure quality releases.
 - Worked on backend validation, API testing, and cross-platform application testing in Agile/Scrum environments.
 - Currently learning Playwright for Automation Testing and expanding backend knowledge in Java and Spring Boot.
-

Growise Infotech Pvt. Ltd. – Flutter Development Intern - (Mar 2022 – Jun 2022)

- Completed hands-on internship focused on developing cross-platform mobile applications using Flutter.
 - Gained practical exposure to UI testing, application functionality validation, state management, and Agile team collaboration.
 - Assisted in testing and validating real-time application features while understanding the complete mobile application development lifecycle.
-

| PROJECTS

Medical Guidelines Apps

- Worked on CE-certified medical guideline applications for mobile, web, and desktop platforms used by healthcare professionals from European and American medical societies.
- Performed functional, regression, smoke, and cross-platform testing to ensure application quality, stability, and compliance.
- Validated backend integrations including Firebase Authentication, Realtime Database, Storage, and Analytics for accurate data flow and user functionality.
- Reported and tracked defects, verified bug fixes, and collaborated with developers to maintain high-quality releases for compliance-critical systems.
- Contributed to CI/CD workflow improvements using GitHub Actions, Shell scripts, and Python

automation scripts for automated build and deployment processes.

Gallery App (Flutter • AWS Lambda • S3) — Intern

- Contributed to the development and testing of a cross-platform gallery application using Flutter with AWS cloud integration.
 - Performed functional and UI testing for image/video upload, backup workflows, and cross-platform user experience validation.
 - Validated AWS S3 backup functionality, serverless workflows, and media upload processes including retry and resume scenarios.
 - Assisted in identifying and reporting defects, verifying bug fixes, and ensuring application stability and performance across different devices and platforms.
