| PROFILE

Software Developer with 3 years of experience in software application development and backend integration using Java. Skilled in developing RESTful APIs, object-oriented programming, database management, and cloud services using AWS and Firebase. Experienced in delivering healthcare, event management, gallery, and donation tracking applications with a focus on scalability, performance, and code quality. Currently expanding expertise in Java, **Spring Boot**, **Hibernate**, **Maven**, and **PostgreSQL** to build enterprise-grade backend systems and full-stack applications.

| Technical SKILLS

Languages: Java, Dart, SQL, JavaScript, C++

Frontend: Flutter, HTML, CSS, Responsive UI Development

Backend: Java, REST APIs, API Integration, Authentication & Authorization

Databases: Firebase Realtime Database, MySQL, PostgreSQL

Cloud: AWS (EC2, S3, IAM), Firebase (Authentication, Storage, Analytics, Realtime Database)

Tools & Platforms: Git, GitHub, GitHub Actions, CI/CD, Maven, Postman, IntelliJ IDEA, VS Code, Android Studio, Shell Scripting

CS Fundamentals: Object-Oriented Programming (OOP), Data Structures & Algorithms, DBMS, Operating Systems, SDLC, Design Patterns, Problem Solving

Currently Learning: Spring Boot, Spring MVC, Spring Data JPA, Hibernate, PostgreSQL, Microservices

| WORK EXPERIENCE

Borm Bruckmeier Verlag GmbH – Software Developer - (Aug 2022 – Present)

- Developed and maintained CE-certified healthcare applications across mobile, web, and desktop platforms using Flutter with Java-based backend integration.
 - Integrated RESTful APIs for authentication, data synchronization, and clinical content delivery, improving reliability and maintainability of backend communication.
 - Supported multi-platform deployments and optimized development workflows using GitHub Actions and shell-script automation.
 - Currently expanding backend expertise in Java, Spring Boot, Hibernate, Maven, and PostgreSQL for full-stack and backend-focused roles.
-

Growise Infotech Pvt. Ltd. – Flutter Development Intern - (Mar 2022 – Jun 2022)

- Developed cross-platform mobile applications using Flutter, contributing to feature development and UI implementation.
 - Collaborated in an Agile team environment, supporting testing, code reviews, and application delivery.
 - Contributed to real-time app features and refined understanding of the full mobile development lifecycle.
-

| PROJECTS

Medical Guidelines Apps

- Developed and maintained healthcare applications used by medical professionals, integrating Java-based backend services and RESTful APIs for clinical content delivery.
- Designed and supported backend integrations for authentication, data synchronization, and secure access to medical guidelines across mobile and web platforms.
- Worked with cloud services including AWS and Firebase for data storage, user management,

analytics, and scalable content distribution.

- Contributed to application architecture, API integration, and performance optimization to ensure reliable and scalable healthcare solutions.
 - Automated build, testing, and deployment processes using GitHub Actions and Shell scripting, improving CI/CD efficiency and release reliability.
-

Event & Donation Tracking App (INTERN)

- Developed an event and donation management application enabling users to create events, track expenses, and manage donations efficiently.
 - Designed and integrated backend data handling and validation mechanisms to ensure accurate and reliable transaction tracking.
 - Implemented real-time data updates and business logic to support event management and donation workflows.
 - Built responsive and user-friendly interfaces while maintaining clean, scalable, and maintainable application architecture.
-

Gallery App (Flutter • AWS Lambda • S3) — Personal Project

- Built a user-friendly gallery app with clean architecture in Flutter, leveraging AWS for reliable media backup.
 - Implemented automatic image/video backup to S3 via serverless workflows (Lambda + pre-signed URLs).
 - Designed a modular, testable codebase (Clean Architecture) with clear separation of UI, domain, and data layers.
 - Focused on performance, resiliency (retry/resume uploads), and a smooth cross-platform UX
-

| EDUCATION

- Master of Computer Science (2022) – Savitribai Phule Pune University
Indira College of Arts,Commerce and Science,Pune (9.8 CGPA)
- Bachelor of Computer Science (2020) – Savitribai Phule Pune University
Tikaram Jagannath College,Pune. (66.9%)
